

Group Assignment

SE2032 – Database Management Systems

Semester 2, 2026

General Instructions:

1. This assignment carries **10% out of the final marks**.
2. This assignment must be done in groups of 4 members. Students must use the same grouping used for the other Y2S1 modules.
3. Late submissions will be penalized.
4. The submission file should be a PDF document.
5. The assignment deadline and link will be published on the course website.

Each group should do the following.

1. Use the **real-world** problem that you identified for the course model SE2012 to do the SE2032 assignment. **Submit the project details.**
 - i. Topic
 - ii. Client details
 - iii. Each member's scope
 1. Each member must have an equal scope to complete, which covers **all the aspects of development**.
 2. **No member** should focus only on one aspect of developing the database. (i.e. designing the ER model)
2. **Using the requirements that you gathered from the client for the assignment SE2012.**
 - a. Write a brief overview of the organization.
 - b. Identify all the requirements to design the database.
 - c. Identify the queries that are necessary for the organization.
 - d. Design the ER/EER model.
 - e. Map the ER/EER model into the relational database schema. Show the criteria of the mapping process.
 - f. Write the Data Dictionary for the database.

Group Assignment

SE2032 – Database Management Systems

Semester 2, 2026

- g. Compile a report according to the given template.

3. Implement the database

- a. Create the database using MySQL or any other suitable relational database management system. Note. All the required constraints should be defined wherever necessary.
- b. Populate the database with your own data set.
- c. Write SQL statements for the queries that you have identified. Note: You may use the same queries for your SE2012 assignment.

Submission Requirements

- Create a folder. The folder name should have your **Group ID**.
- Place the report inside the created folder.
- Finally zip the main folder and upload it to the given link in the Courseweb.
- **Group Report** should be submitted on or before **30th of September 2026 11.45 pm.**
- **Viva** and the **demonstration of the created database** (last week of the semester).

Grading Criteria

Group Report Template (5%)

Section	Description	Marks
Cover page	Include Group ID/student IDs	5 marks
Table of contents		
List of figures		
List of tables		
Introduction	Client details, Project Scope, Overview	5 marks
Requirements for database design		10 marks
ER/EER model		20 marks

BSc (Hons) in Computer Science Year 2

Group Assignment

SE2032 – Database Management Systems
Semester 2, 2026

Mapping to relational database		15 marks
Data Dictionary	Two entities/relation per student Minimum (Relevant student id should be mentioned for each entity/relation)	15 marks

Creating the database	Two tables per student minimum (Relevant student id should be mentioned for each table)	10 marks
Populating the data	Two tables per student Minimum (Relevant student id should be mentioned for each table)	5 marks
SQL queries	Four queries per student Minimum (Relevant student id should be mentioned for each query)	15 marks

Viva (5%)

Criteria	Description	Marks
Database design	Individual Mark	40
Best Practices	Individual Mark	10
Presentation Skills	Individual Mark	10
Demo of database	Individual Mark	30
Answering questions	Individual Mark	10
